

Inventory layout

ansible_inventory.git:

```
dev/           # an inventory defines one environment
  hosts        # define the groups in the inventory
  group_vars/  # variables for particular groups
    all        # all is reserved, don't use it
    db/        # directory for db group
      vars.yml  # plaintext variables for db group
    web/       # directory for web group
      vars.yml  # plaintext variables for web group
  host_vars/   # we rather not use this
    hostname1  # if systems need specific variables,
```

Jinja2

- Python templating language
- Many filters available
(to_nice_json, to_nice_yaml, sort)
- Conditional evaluation on task result
(success, changed, failed, skipped)
