

Excercise

Use a project and an inventory

- Deploy to the group 'db'

```
./playbook.yml -l db --ask-vault-pass # s3cr3t is the password
```

- Deploy Java to the group 'development'

```
./playbook.yml -l development --tags java
```

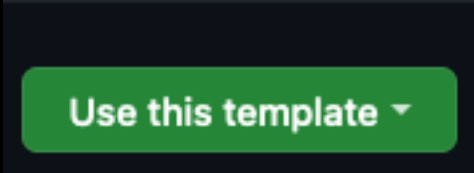

- Add a group for 'amq' to the inventory

```
vi ../ansible_inventory/dev/hosts
```

```
./playbook.yml -l amq --tags amq
```

Exercise

Run a role in a codespace

- Browse to https://github.com/playingfield/ansible_role_web
